

INTERACTIVE TOTEM

A solution to create unforgettable shopping experience and a way to increase the probability of additional sales.

Prestigio IDS Totem is a solution which gives customers the opportunity to use familiar interactive features of online store in offline environment at your point of sale, show all the goods that did not fit on the shelf, provide information on related products, run unusual interactive campaigns.

COMPREHENSIVE ADVERTISING CAMPAIGNS

IR touch screen of the device supports up to 10 touch points at the same time. FHD resolution of the display helps to deliver excellent advertising campaigns and impress customers with brilliant image quality. In addition, your content will be enriched with sound effects from built-in speakers.

COMPLETE SOLUTION

Built-in computer based on Windows 10 IoT together with specialized software provides complete solution and enables the creation, management and distribution of advertising content across multiple displays at any time

PROTECTED CASE

Casing of device is made from metal as well as having tempered glass. This allows to use it in any public place whilst not having to worry about it's security.

MAIN ADVANTAGES

Prestigio IDS Totem is a solution to increase sales and to show more products without putting it on a shelf. This helps to save the buyer in your infrastructure and to provide unforgettable shopping experience.
